FX Options and Structured Products

The FX derivatives market consists of FX swaps, FX forwards, FX or currency options, and other more general derivatives. FX structured products are either standardized or tailor-made linear combinations of simple FX derivatives including both vanilla and exotic options, or more general structured derivatives that can't be decomposed into simple building blocks.

FX Options and Structured Products 2e - MathFinance

This means that structured products are closely related to traditional models of options pricing, although they may also contain other derivative categories such as swaps, forwards, and futures ...

An Introduction to Structured Products

FX Options and Structured Products | Wiley There has been an explosive growth in the number of corporates, investors and financial institutions turning to structured products to achieve cost savings, risk controls and yield enhancements.

FX Options and Structured Products | Wiley

Put FX option is a contract in which a client (buyer) has the right, but not the obligation, to sell a specified amount of one currency for another currency at a specified exchange rate (strike rate) within a fixed period of time on the terms of an FX Contract. Unlike financial products traded on an Exchange, FX Options are non-standardised ...
