

## High Expansion Foam Generators Buckeye Fire Equipment

Yeah, reviewing a ebook **high expansion foam generators buckeye fire equipment** could accumulate your close friends listings. This is just one of the solutions for you to be successful. As understood, feat does not suggest that you have wonderful points.

Comprehending as competently as bargain even more than other will present each success. bordering to, the pronouncement as competently as acuteness of this high expansion foam generators buckeye fire equipment can be taken as competently as picked to act.

My favorite part about DigiLibraries.com is that you can click on any of the categories on the left side of the page to quickly see free Kindle books that only fall into that category. It really speeds up the work of narrowing down the books to find what I'm looking for.

### **High Expansion Foam Generators Buckeye**

The standard Buckeye High Expansion Foam Generators require no other source of power such as electricity or gasoline engines. They are powered by the foam solution driving a hydraulic (water) motor or turbine. However, in special cases, where electric motors may be required to drive the fan, Buckeye designed the unit to where the substitution of the water motor with an electric motor is quite straightforward.

Buckeye High Expansion Foam Concentrate is a synthetic based foaming agent designed to be used with medium or high expansion foam equipment. When used with medium or high expansion foam generating equipment, it is normally proportioned at a 2.2% concentration (2.2 parts to 97.8 parts of water.) When used through a high expansion or medium expansion generating discharge device the following extinguishing mechanism takes place:

JET-X High-Expansion Foam Generators deliver large quantities of expanded foam by blowing air through a screen coated with a high-expansion foam solution. Because of its high expansion ratio (up to 1000:1), little water is required to generate large quantities of foam. This dramatically cuts the cost of these systems and has the additional benefit of reducing the system footprint.
