I learnt first order logic a few months ago as well as fitch-style natural deduction as a proof system. It's been incredibly helpful in terms of working through exercises in math books. It very much reminds me of algebra classes in high school where you could translate a problem into symbols and manipulate the symbols to get the answer you want.

Home for PHIL 12 - Introduction to Logic

Does the side of formal proof calculi in the Curry-Howard correspondence have specific logic system(s) in mind? What logic system(s) (e.g. propositional logic, first order logic, second order logic, non-classic logic systems) can be used for the side of formal proof calculi in the Curry-Howard correspondence?
Thanks.

LPL Exercise 6.3 : logic

INTRODUCTION TO SYMBOLIC LOGIC (PHIL 114, Sec. 1001)
