Dirk Van den Abeele - Wikipedia

In January 2015 I was invited by Ms. Henriette van der Zwan to become associated study leader of her PDH study to sequence the genome of genus Agapornis. The first species on the list was Agapornis roseicollis and in 2016 we collected blood samples of these birds. The genome of Agapornis roseicollis has been sequenced in 2017. (DNA sequencing is the process of determining the precise order of ...

Red lovebirds, a mutation? [Genus Agapornis] By Dirk Van den Abeele (16-02-2005) (updated 13/12/2007) It was around 1980 when I first came across a 'red' love bird in a shop. It was a lutino A. roseicollis hen which for some reason was coloured almost completely red. The result was an almost completely red bird, with red eyes, white primaries and an occasional yellow feather.

Articles UK - Dirk Van den Abeele

Fallow Mutations. DIRK VAN DEN ABEELE. Not lno but still a bird with red eyes—this is the image that most breeders conjure up when they hear the term 'Fallow'. And this is correct. In all mutations described as Fallow the eumelanin in the eyes has been reduced in one way or another, causing a deviating eye colour.
