Using Candlestick Charts To Trade

Software trading platforms automatically chart streaming price data, perform intricate calculations, and apply indicators. Long gone are the days of graph paper and pencil. All the technical trader needs to do is choose an indicator (or indicators) and interpret the data. In the case of the candlestick chart, indicators are best applied as overlays. A chart overlay is simply the transposition of such indicators as moving averages, Bollinger Bands, and Fibonacci tools on existing candlesticks.

Tips for Using a Candlestick Chart in Futures Trading

The hammer is a bullish reversal candlestick. It is one of the most (if not the most) widely followed candlestick pattern. It is used to determine capitulation bottoms followed by a price bounce that traders use to enter long positions. A hammer candlestick forms at the end of a downtrend and indicates a near-term price bottom.

Understanding a Candlestick Chart - Investopedia

Candlestick Charts just above and below the real body are the "shadows." Chartists have always thought of these as the wicks of the candle, and it is the shadows that show the high and low prices of that day's trading. When the upper shadow (the top wick) on a down day is short, the open that day was closer to the high of the day.
